

AUGUST 2010

BLUE SAPPHIRE

ZIRCON

AMETHYST

AQUAMARINE

BURMESE RUBY

TANZANITE

PERIDOT

We have lots of exciting new stock ready for the fair after Debi and Barbara's recent buying trip to Bangkok and Sri Lanka. Although the global financial crisis has restricted production and availability of finer quality Gems, after a lot of hard work they were able to find some great pieces. The dealers O/S say that Spinel is very popular and we have some wonderful large Gems as well as smaller pieces in fine red, pinks, mauves and blues. We also have rare Demantoid garnet from Madagascar in a variety of sizes and a great selection of Tsavorite. Sapphire sales have been very steady and our sapphire stock in all colours looks great including the difficult to find larger rounds, cushion and radiant cuts. Ruby is still very rare and difficult to get in the quality we desire but our stock is quite extensive in Burmese and African. Alexandrite, Aquamarine, Tourmaline, Peridot and a variety of quartz are all very well represented in our stock and we look forward to displaying it at the fair.

DEMANTOID

## AUGUST BIRTHSTONE

Peridot has been used as a gemstone for thousands of years, the Egyptians were mining it on the Isle of Zabargand in 1500 BC. More recently fine quality Peridot is found in Burma and China. Available in smaller inexpensive calibrated sizes, peridot is also available in larger fine quality gems which command higher prices.

Debi and Barbara have just returned from a successful buying trip and our exciting new stock will be on show at the JAA International Jewellery Fair. You can see our latest range of fine gems at Stand H47.

YELLOW SAPPHIRE

GOLDEN SAPPHIRE

### YELLOW BERYL

Available in larger gem sizes in hues ranging from pale lemon yellow to intense golden yellow. It is a great lower cost alternative to yellow sapphire with a hardness of 7.5-8.

### ZIRCON

Means 'golden colour' and has brilliance and fire. It is available in larger sizes which are attractive in pendants. Colours range from champagne and cognac hues through to intense canary yellow.

### CHRYSOBERYL

With a hardness of 8.5 chrysoberyl makes an excellent ring stone. Yellow colours range from yellow to yellow-green and golden yellow. Available in limited shapes and sizes upwards of 1.5ct.

### CITRINE

The yellow variety of quartz and is available in calibrated sizes as well as free sizes in larger individual stones. Colours vary from pale yellow to the rich brandy coloured hues.

### TOPAZ

Has a soft yellow to slightly reddish yellow colour. It is available in limited shapes and sizes.
